Our Services

Consultancy

Consultancy for casting, fabricated parts, machining, forging, rubber rolls, chrome plating, etc. To provide a complete and tangible solution to your problem.

Design

Our framing of the engineering design process delineates the following stages: research, conceptualization, feasibility assessment, establishing design requirements, preliminary design, detailed design, production planning and tool design, and production.

New Product Development (NPD)

New product development is described in the literature as the transformation of a market opportunity into a product available for sale and it can be tangible or intangible.

Make It Your Own

If you think a document that looks this good has to be difficult to format, think again!

We've created styles that let you match the formatting in this brochure with just a click. On the Home tab of the ribbon, check out the Styles gallery.

This is the Quote style. It's great for calling out a few very important points.

Customize in Almost No Time

To try out other looks for this brochure, on the Design tab of the ribbon, check out the Themes, Colors, and Fonts galleries.

Have your own company fonts or colors? No problem! Those galleries give you the option to add your own.

Make It Picture Perfect

To replace any photo with your own, just right-click it and then click Change Picture.

If your photo is not a flawless fit for the space, you can crop it to fit in almost no time. Just select the picture and then, on the Picture Tools Format tab, click Crop.

Overview of Programs

Risk Management

Risk Management is the process of identifying, analyzing and responding to risk factors throughout the life of a project and in the best interests of its objectives. Proper risk management implies control of possible future events and is proactive rather than reactive.

Strategic Sourcing Solution

This is the process of taking advantage of purchasing opportunities by continually reviewing current needs against purchasing opportunities.

Cost Optimization/Negotiation

Project managers need to apply negotiation skills throughout the project life cycle. Early on in a project, as requirements are being captured and initial plans produced, the project manager may need to balance the time, cost, quality and scope requirements of the project and negotiate with stakeholders.

Getting Started

What to Include?

We know you could go on for hours about how great your business is. (And we don't blame you—you're amazing!) But since you need to keep it short and sweet, here are a few suggestions ...

*“Your company is the greatest. I can't imagine anyone living without you.” —
Very smart customer*

Focus on What You Do Best

If you're using this booklet for a company brochure, these middle pages are a good place for a summary of competitive benefits or some of those glowing testimonials, like the one above.

You might also want to mention a few of your most impressive clients here:

- Big, important company
- Really well-known company
- Very impressive company

Additionally, you could include a bulleted list of products, services, or major benefits of working with your company. Or just summarize your finer points in a few concise paragraphs.

If your business doesn't lend itself to photos as easily as the beautiful culinary examples shown in this template, have no fear. You can just select and delete a page of photos and replace it with text using the styles provided.

A picture is worth 10,000 words, but only if it's the right one. In marketing materials, remember that any image you use—good or bad—makes a statement about your business.

Don't Forget the Mission

This is a great spot for a mission statement
